PROFESSIONAL SUMMARY

Computer Science student at BINUS University with hands-on experience in web application development and quality assurance. Skilled in manual testing, test case design, bug reporting, SQL validation, and technical documentation. Built web-based applications using Python, Flask, JavaScript, HTML/CSS, SQL, Selenium, and machine learning. Seeking opportunities in App Development, Full Stack Development, or Quality Assurance.

TECHNICAL SKILLS

Programming: Python, Java, C, JavaScript, HTML, CSS, SQL
App / Web Development: Flask, REST API, Web Application Development, Front-End Development, Back-End Development
Quality Assurance: Manual Testing, Functional Testing, UI/UX Testing, Regression Testing, Test Case Design, Test Execution, Bug Reporting, Defect Tracking, Retesting
Tools: Git, GitHub, VS Code, JIRA, Postman, Selenium, BeautifulSoup, Figma
Data / Machine Learning: Pandas, NumPy, Scikit-learn, TF-IDF, Logistic Regression, NLP

EXPERIENCE

Quality Assurance (Freelance) | K3Mart

Jan 2026 – Jun 2026

- Performed manual and functional testing on mobile and web applications based on application requirements and expected user flows.
- Created and executed test cases covering functional requirements, UI behavior, forms, navigation, validation, and end-to-end user flows.
- Identified, documented, and reported bugs with clear reproduction steps, expected results, actual results, and supporting evidence.
- Performed regression testing after bug fixes to verify fixes and ensure existing features remained functional.
- Inspected browser Network tools to monitor API requests, HTTP status codes, request and response payloads, and backend responses during testing.

PROJECTS

Fake Review Detection (ReviewIN) | Python, Flask, HTML/CSS, JavaScript, Selenium, TF-IDF, Logistic Regression

- Developed a web-based system to classify e-commerce reviews as BOT or HUMAN and generate fraud scores.
- Built Amazon review collection and Regex-based preprocessing using Selenium.
- Integrated ML inference, Explainable AI indicators, and an interactive dashboard into a Flask application.

Sentiment Analysis Web Application | Python, Flask, Scikit-learn, TF-IDF, Linear SVM, JavaScript

- Developed a web-based sentiment analysis application for Indonesian Shopee and Tokopedia reviews.
- Built review parsing and text-cleaning workflows and implemented TF-IDF + Linear SVM for sentiment classification.
- Integrated the ML pipeline with Flask and interactive result visualization.

Motorcycle Helmet Detection | Python, Flask, OpenCV, Machine Learning

- Developed a helmet detection application with image preprocessing and machine learning.
- Trained and integrated the model pipeline into a Flask-based application.

DreamTale UI/UX Prototype | Figma, UI/UX, Human-Computer Interaction

- Designed a mobile application concept for parents of toddlers aged 0–5 and created user flows.
- Created a high-fidelity interactive prototype in Figma.

EDUCATION

Bina Nusantara University | B.Sc. in Computer Science

Sep 2024 – Present

Relevant Coursework: Data Structures, Algorithms, Machine Learning, Human-Computer Interaction, Computer Networks, Software Engineering.
